

Competence Pass (COMPASS)

Fast Facts

COMPETENCE

What is a Competence Pass?

World ICU's Competence Pass (COMPASS) is a record of a person's capabilities that provides information not only about what the individual can do today, but also what they need to complete or accomplish to be able to work in areas where they are not yet competent.

The Competence Pass:

- Provides immediate results utilizing swipe card and other technologies
- Shows "readiness" for workforce deployment
- Incorporates medical information in case of an incident or emergency
- Links to immediate resources for "just-in-time" training
- Provides transferable results between departments and companies
- Provides portability of skills and credentials between organizations and is ideal for assessing contractor's workforce capabilities
- Provides web-based lifelong portfolio-tracking for all present and potential employers
- Is a guarantee to the employer of workplace skills and knowledge
- Ongoing "apps" development for I-Phone or I-Pod, tablet and other mobile device applications

***COMPASS allows employers to know in an instant that they have
a competent workforce in place.***
